

# The Focused Sprint –2 weeks

## Situation:

You have a specific challenge – about to start working on something - you've heard AI can help but not sure where to start.

## Examples:

- 1) You want to understand what on earth this AI thing is all about but don't have time to do endless online courses
- 2) you need to make a website but it's going to have to be a bit DIY.
- 3) Thinking about a new business idea and want to get it out of your head and crystallise it fast so you can start talking about it and getting feedback
- 4) You are frustrated with AI and want it to draft outputs that are more close to your voice
- 5) You need to whip up a quick landing page to actually get something out there

## Here's the deal:

- Up-front payment of **£595+VAT**
- You complete my questionnaire with as much info as you can.
- I'll review it and design a session just for you
- We meet **1:1 online for 45mins** and I'll show you how AI can support you in the task including practical application

## A note on scope:

You'll probably have a range of tasks you could think of for this but we are **going to niche down on one specific one** so you really nail your understanding and can take away real learning and clarity on next steps. *Check out my 3 for 2 bundled sprint offer if you think you'll need to cover more ground.*
